

CHASSEUR

If you are not sure which size to choose, measure a similar garment at home and compare these measures to the garments measures below. If you need other measures such as: longer sleeve, bigger waist etc. Pls send us an email at mtm@coloniaire.com and we are happy to help you out changing the measures you want and make one garment specially for you.

A: Body length

- place your garment flat on the floor with the chest facing down towards the floor. Measure the length from the bottom of the neck to where the garment ends.

B: Shoulder width

- place your garment flat on the floor with the chest facing down towards the floor. Measure the shoulder width from side to side

C: Chest width

- place your garment flat with the back facing down towards the floor. Take the measure 2 cm below the armpit. Measure from armpit to armpit

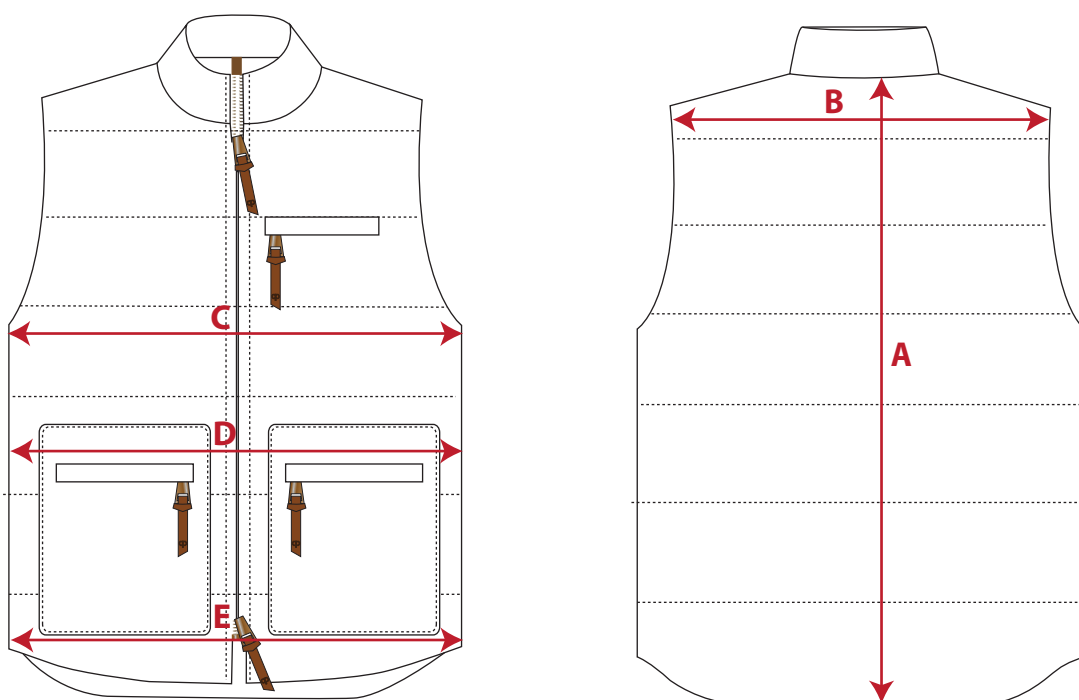

D: Waist width

- place your garment flat with the back facing down towards the floor. Measure from edge to edge where the garment is at its narrowest. Around 18 cm below armpit

E: Bottom width

- place your garment flat with the back facing down towards the floor. Measure from edge to edge, 3 cm above the bottom end.

*** NOTE! Due to quite heavy padding the style is quite tight/small in size. We suggest that you choose 1 size up. If you normally wear size 50, buy a size 52.**
